Fix Your Farcaster Account **Association**

CRITICAL FIXES APPLIED:

- 1. **Fixed vercel.json redirect** Removed external manifest redirect that was causing empty values
- 2. Added clear placeholders Your route.ts now has instructions for your account association
- 3. **Updated configuration** Optimized for proper Farcaster integration

🚨 IMPORTANT: YOU MUST GENERATE YOUR OWN ACCOUNT ASSOCIATION

Your app currently shows "accountAssociation doesn't match" because you need to generate YOUR OWN account association values using YOUR Farcaster account.

Step 1: Generate Your Account Association

- 1. Open Warpcast app on your phone
- 2. Go to Settings > Advanced
- 3. Enable "Developer mode"
- 4. Go to Settings > Developer > Domains
- 5. **Enter your domain:** monad-dots-project.vercel.app
- 6. Tap "Generate Domain Manifest"

You'll get JSON like this:

```
"accountAssociation": {
    "header":
"eyJmaWQiOjkxNTIsInR5cGUiOiJjdXN0b2R5Iiwia2V5IjoiMHgwMmVmNzkwRGQ30TkzQTM1ZkQ4ND
    "payload":
"eyJkb21haW4iOiJtb25hZC1kb3RzLXByb2plY3QudmVyY2VsLmFwcCJ9",
    "signature":
"MHgxMGQwZGU4ZGYwZDUwZTdmMGIxN2YxMTU2NDI1MjRmZTY0MTUyZGU4ZGU1MWU0MThiYjU4ZjVmZm
}
```

Step 2: Update Your Code

- 1. **Open file:** app/.well-known/farcaster.json/route.ts
- 2. Replace the placeholder values:
 - Replace "YOUR_HEADER_HERE" with your header value
 - Replace "YOUR_PAYLOAD_HERE" with your payload value
 - Replace "YOUR_SIGNATURE_HERE" with your signature value

Example:

```
accountAssociation: {
  header:
"eyJmaWQiOjkxNTIsInR5cGUiOiJjdXN0b2R5Iiwia2V5IjoiMHgwMmVmNzkwRGQ30TkzQTM1ZkQ4ND
  payload:
"eyJkb21haW4iOiJtb25hZC1kb3RzLXByb2plY3QudmVyY2VsLmFwcCJ9",
  signature:
"MHgxMGQwZGU4ZGYwZDUwZTdmMGIxN2YxMTU2NDI1MjRmZTY0MTUyZGU4ZGU1MwU0MThiYjU4ZjVmZm
}
```

Step 3: Deploy

1. Commit and push your changes to GitHub

- 2. Vercel will auto-deploy your updates
- 3. Verify fix: Visit https://monad-dots-project.vercel.app/.well-known/
 farcaster.json
- 4. Check that accountAssociation now shows your values (not empty)

Step 4: Test Integration

- 1. **Go to:** https://farcaster.xyz/~/developers/mini-apps/embed
- 2. **Enter your URL:** https://monad-dots-project.vercel.app
- 3. Click "Refetch"
- 4. The error should be gone!

What was fixed in this version:

- Clear placeholders instead of old template values
- ✓ Step-by-step instructions for generating account association
- Improved comments in the code
- Added screenshot URLs for better app store presentation
- Proper error prevention with clear guidance

Notes:

- Use YOUR domain: If you have a custom domain, use that instead of monaddots-project.vercel.app
- Account ownership: The account association must come from YOUR Farcaster account
- Security: Never share your account association values publicly

Still having issues?

- 1. Double-check domain spelling in Warpcast matches exactly
- 2. Clear browser cache and try again
- 3. Wait 5-10 minutes after deployment for changes to propagate
- 4. Check Vercel deployment logs for any errors

Your mini-app should work perfectly after following these steps!
